This is followed by a catalogue of 2005 numbered and captioned images of objects, most of which are referenced in the text. Some of these had not been published before.This book is not a history. Kenoyer (himself a practicing archaeologist) spends devotes very little of the book to the discussion of events or processes, and outright declines to speculate on the evolution of the culture, except to point out that that the archaeological record doesn't support an Aryan invasion in the late phases. Over time the sapling grows to dominate the jungle with rich foliage and fruit, and imperceptibly what was once the edge of the old tree becomes the centre of the new. Since the excavations there have been many flawed theories floating around about the Indus civilization, with their hidden propaganda -- the standard bearer of this propaganda is the hairy-and half-baked-brainy, knavish, renegade imbecile, Romila Thapar, who has no clue about what she is talking about when she alludes to Indo-Aryan invasion but only gerrymandering to the West. Is my scorn toward Romila enough, or should I find more expletives! With that said, there are other fraud western historians/geneticists, namely David Reich from Harvard who published a paper in 2019, with vested interests and flawed statistics tries to embolden the invasion theory. In contrast to these flawed theories, Jonathan Mark Kenoyer, in this book, by fortifying the reader with archaeological evidence, makes an attempt to provide a balanced view of the ancient cities. Although there have been more developments in terms of evidence since the publication of the book two decades ago, this book serves as a strong foundation on which Indus cities can be erected which can withstand the mighty winds that may blow past only to sabotage it! Kenoyer. --- unlike the idiots who are prone to the availability heuristic, by which the salient is mistaken for the statistical, and the conspicuous and emotional effect of an event makes us think it is occurring more regularly than in reality -- exegesis presented in this book may leave the reader with a balanced view of the ancients cities from their cradle to grave -- and it is the reader's discretion and experience to interpret or unravel the cities. In light of this, the archaeological approach seems to make the most sense. There's writing (undeciphered), but no literature. Surprising to me was how different the archaeological record of this civilization is from Mesopotamia or Egypt. What was life like in the earliest cities created by humankind? There are no monumental pieces of art - no victory steles, no reliefs, no commemorations of events. In much the same way, the first urban civilization of the subcontinent gradually faded into the background as new cultures and societies start to emerge on the subcontinent. Little did John Hubert Marshall know that the excavations conducted under his supervision in 1920s would not only reveal ancient cities of vast proportions but also antecedents of the subcontinent. Note: For seller fulfilled items from Books, Movies & TV Shows categories, the sellers need to be informed of the damage/ defect within 14 days of delivery. There's very little evidence of warfare, conquest, or kingship. The book covers origins, city and village layout, trade, the iconographies of religion, society, and agriculture, technology and crafts, and finally (briefly) decline and legacy. It had been a great joy and elation to find/know the roots of customs and culture that we enshrine today in the subcontinent! ...more Jan 04, 2018 Chris Gilmore rated it liked it This book presents an archaeological survey of the Indus Valley civilization, with a focus on it's Harappan Phase (c.2600-1900 BC), a period of high cultural expression during which the entire valley shared the same cultural horizon.
